Greetings,

Between the obstacles for "One World" (ruled by the people for the people, very far from Bush's World Management) we have the education.

Future Technologies first of all and after all is an educational institution, and our free courses because based on free books are evolving.

What is the Best Universities in the World?

According to the Website, <http://www.topuniversities.com/> that is an American Website, the best University in the World is Harvard University.

The first 10 Universities according to his portal are:

- 1 [HARVARD University](#) [United States](#)
- 2 [University of CAMBRIDGE](#) [United Kingdom](#)
- 3 [YALE University](#) [United States](#)
- 4 [UCL \(University College London\)](#) [United Kingdom](#)
- 5= [IMPERIAL College London](#) [United Kingdom](#)
- 5= [University of OXFORD](#) [United Kingdom](#)
- 7 [University of CHICAGO](#) [United States](#)
- 8 [PRINCETON University](#) [United States](#)
- 9 [Massachusetts Institute of Technology \(MIT\)](#) [United States](#)

10

[California Institute of Technology \(caltech\)](#) [United States](#)

According to this Portal (that I cannot accept in full) there are not good Universities at this level in France, Italy or LatinAmerica.

This week I was busy to design our first Free degree, that is like a Companion for established Universities, because we are not an University yet, and I discover in dramatic terms that the (commercial virus) had infected also the Teachings of the Sciences.

In fact, like we can download Textbooks, at the highest Level in Mathematics from the École Polytechnique ... absolutely for free ... we can found hundred of books in English from US and UK Universities and colleges at High Prices.

I formulate a question. What was the reason you go to the University? ... To be rich, or to help your country and the world?

US Americans will say. If you want to be healed from your disease, you need to pay. If you want to study in our Universities, you need to pay ...

It seems that if you have no money, you have nothing. You may die and live an ignorant ... like a stupid robot in some place doing robotic job, pay and serve. I reply, No Thanks.

The world don't need this. Logically, Professors like Medical Doctors needs to be paid (better if at the same level), but not necessarily become rich and be always full of greed.

This is a serious issue, and I don't feel to apologize for this stress.

We need an homogeneous world where everyone can have access to Information and can have a High Level of Life, not studied in some Laboratory.

We, Future Technologies will offers the Highest level of Mathematics, Languages, Sciences and Humanities ... at affordable price ... from today.

This is want the World needs ... The World neither needs tons of Information that cannot process, but *précision* in the use of our time and resources.

The best we can do is to fix and design the best University Courses at the Highest Level, and then use examinations to be admitted at these Highest Entry Levels.

May be a degree in some University will be the minimum requirement, to access only the "admission".

Before to offer an overview per country about the Top Universities, I can comment that we have:

- French, like a Best School Ever in Mathematics.
- Italian, like the Best School Ever in Physics.
- Germany, like the Best School Ever in Engineering.
- US Americans (I say US American, because I AM American, but US American) are the best choice for Computer Science.
- Russian for Applied Sciences in General
- South American Spanish for the connection to the Gods.
- Britain English are the best choice for Languages ... etc. Of course I want not offend to anyone.
- About Music and Arts, Italian and France remains high.

A degree in Mathematics MUST be made in French based on the French School of Mathematics, like those designed by L'École Polytechnique in Paris, France.

The same is valid for a degree in Physics made in Italian, or an English Course made by England, or a course in Computer Science made in the US.

This will invite at a first glance to learn Languages, French for Mathematics. French people need to learn the other languages starting from English.

Everyone needs to learn Italian for Physics, and Italians need to study English and French.

Everyone needs to learn Spanish to learn the Sacred Religions, as well to teach South American Countries, etc.

This is a "first glue" to avoid "degree validations" around the world. Learn all, and no one can say you nothing, but offer a proof of your wisdom.

I want now to list the first two Universities for some countries:

- France,
 - École Normale Supérieure, Paris - World Position 28
 - École Polytechnique - World Position 36

- Italy,
 - Università degli Studi di Bologna - Word Position: 174
 - Università degli Studi di Roma, La Sapienza - World Position: 205

After my degree in Univerisidad Central de Venezuela (not listed) I enter in "La Sapienza" and then I got my degree in UNIBO, in Bologna.

- Japan,
 - University of Tokyo - Word Position: 22
 - University of Kyoto - World Position: 25

Saturday, 06 March 2010 09:44 - Last Updated Saturday, 06 March 2010 10:56

- United Kingdom
- University of Cambridge - World Position: 2
- University College London - World Position: 4

- Germany,
- Technische Universität München - World Position: 55
- Ruprecht-Karls-Universität Heidelberg - World Position: 57

- Spain,
- Universidad de Barcelona - World Position: 171
- Universidad Autonoma de Barcelona - World Position: 211

- United States
- Harvard University - Leader Position: 1
- Yale University: Position 3

You can go additional information about "TOP Universities" at: <http://www.topuniversities.com/country-guides/united-states>

Thanks to God **that not all** the countries have the "Death Sentence", "Your money or you die", or "Your money or your children will be robots" ...

Have a nice day,

Giovanni A. Orlando.
